Introduction to Feng Shui

For health and wellbeing

Lizette
Akouri

SYDNEY: 25-26 November 2017

By using Feng Shui methods we can align the energies to the Heaven, Earth and your personal energy and create balance. These energies have the potential to improve wealth, health and relationships and deplete the negative influences.

Feng Shui is an ancient Chinese Art of working with the environment and energies of a property so that they can be optimised for wealth, health and harmonious relationships. In any place and time, the energies of Heaven, Man and Earth interact.

Heaven energies are influences from the Solar Planetary system; Earth energies are influences from the land, buildings and roads around the building as well as the directional energies; Man's energies come from their date and hour of birth.

This ancient Art of placement is based on the theories of Yin and Yang, Yin meaning inactivity and Yang activity, and the balance of the Five Elements of Earth, Metal, Water, Wood and Fire.

To create balance and harmony natural resources from these five elements are used.
