	<i>Foreword</i>	i
	<i>Editors' Foreword</i>	iii
	Bibliographical Introduction	1
1st Difficulty	The true intentions of the radial pulse diagnosis	7
2nd Difficulty	Distinguishing the inch, bar, and cubit	13
3rd Difficulty	The cubit, inch, Yin and Yang of pathological pulses	17
4th Difficulty	Yin and Yang of the superficial and deep levels	23
5th Difficulty	Finger pressure in pulse diagnosis	31
6th Difficulty	Yin, Yang, deficiency, and excess of the pulse	35
7th Difficulty	Transformation of pulse qualities in the different seasons	41
8th Difficulty	Death can occur even when the radial pulse is healthy	45
9th Difficulty	Distinguishing disease through the slow and rapid pulse	51
10th Difficulty	Distinguishing pulse qualities that are affected by the ten different pathogens	53

11th Difficulty	Running out of Qi in a Zang organ	57
12th Difficulty	Treatment methods in situations of interior and exterior depletion	59
13th Difficulty	The relationship between the pulse, colour, and skin	63
14th Difficulty	Zhi (rapid) and Sun (slow) in the pulse quality	71
15th Difficulty	Pulses in different seasons	81
16th Difficulty	Relationship between the pulse patterns, symptom patterns, visual patterns, and abdominal patterns	91
17th Difficulty	Matching and mismatching between the pulse pattern and symptom pattern	99
18th Difficulty	Six positions of the radial pulse and their corresponding Zang Fu organs and meridians	103
19th Difficulty	A healthy pulse and a diseased pulse for males and females	109
20th Difficulty	Pulse of Hidden and Concealed, Overpowering Yang, Overpowering Yin, Deprived Yang, and Deprived Yin	113
21st Difficulty	Situations when there are symptoms but the pulse is healthy, and when there are no symptoms but the pulse is unhealthy	117
22nd Difficulty	Shi Dong disease and Suo Sheng disease	121

23rd Difficulty	The length, beginning and ending of the fourteen meridians and Qiao meridians	125
24th Difficulty	Symptoms that arise when each meridian ceases	131
25th Difficulty	The Pericardium	139
26th Difficulty	The collaterals	143
27th Difficulty	Reason for the Extraordinary Vessels	147
28th Difficulty	Flow of the Extraordinary Vessels	151
29th Difficulty	Symptoms of the Extraordinary Vessels	157
30th Difficulty	The generating process, characteristics, and circulation, of Nutritive and Defensive Qi	159
31st Difficulty	Location and functions of the Triple Heater	163
32nd Difficulty	Heart Blood is Nutritive Qi and Lung Qi is Defensive Qi	167
33rd Difficulty	The reason why the Lungs float and Liver sinks	169
34th Difficulty	The voice tone, colour, smell, taste, and Spirits of the Five Zang organs	173
35th Difficulty	Name and functions of the Fu organs. The Nutritive and Defensive Qi are Yang Qi	181

36th Difficulty	The right Kidney is the Ming Men	187
37th Difficulty	The relationship between the Five Zang organs and the nine orifices	189
38th Difficulty	The Triple Heater is a Fu organ	193
39th Difficulty	There are Six Zang organs when the Ming Men is included	195
40th Difficulty	The Liver dominates colour, the Heart dominates smell, the Spleen dominates taste, the Lungs dominate voice, and the Kidneys dominate fluids	197
41st Difficulty	The Liver has functions with both Yin and Yang aspects	201
42nd Difficulty	The length and size of the Stomach and Intestines	203
43rd Difficulty	The reason why humans die without eating for seven days	209
44th Difficulty	The Qi Chong Men [Seven penetrating gates]	211
45th Difficulty	The eight meeting points	213
46th Difficulty	The reason why elderly people develop insomnia	217
47th Difficulty	The reason why the face can resist coldness	221
48th Difficulty	The Three Deficiencies and Three Excesses	223

49th Difficulty	Meridians become ill by themselves and the Five Pathogens	229
50th Difficulty	The deficient pathogen, excess pathogen, true pathogen, minute pathogen, and bandit pathogen	241
51st Difficulty	How to distinguish the illness of Fu disease and Zang disease	251
52nd Difficulty	Differences between the illness of Fu disease and Zang disease	255
53rd Difficulty	The Seven Conductions and Between Organs	257
54th Difficulty	Zang disease is difficult to cure but Fu disease is easier to cure	263
55th Difficulty	The illness of Ji Ju [Accumulation and Aggregation]	267
56th Difficulty	The cause of formation and the shape of Ji Ju illness	269
57th Difficulty	Sign and symptoms of five types of diarrhoea	275
58th Difficulty	Categorisation and pulse patterns of febrile diseases	279
59th Difficulty	Illness of derangement and seizures	285
60th Difficulty	Obstruction Heart pain, True Heart pain, Obstruction headache, and True headache	289
61st Difficulty	Reasons for the four diagnostic methods	293

62nd Difficulty	The reason why Source points exist on the Yang meridians	297
63rd Difficulty	The reason why the five antique points start from Jing-Well	299
64th Difficulty	The Yin meridians start from the Jing-Well wood points and the Yang meridians start from the Jing-Well metal points	301
65th Difficulty	Differences between the Jing-Well points and the He-Sea points	303
66th Difficulty	The Yuan-Source points	305
67th Difficulty	The back Shu points and the front Mu points	309
68th Difficulty	Indications of the five antique points	311
69th Difficulty	Primary rules for tonification and dispersion of deficiency and excess	323
70th Difficulty	The reason why the depth of needling should be adjusted in the four seasons	327
71st Difficulty	Different needling methods for the Defensive Qi and Nutritive Qi	331
72nd Difficulty	Needling methods to regulate the Yin and Yang through different needling directions	333

73rd Difficulty	Using Ying-Spring points instead of Jing-Well points for dispersion	335
74th Difficulty	The reason why point selection should be changed according to the four seasons	337
75th Difficulty	The reason for the point selection of Lung deficiency Liver excess syndrome pattern and other 75th Difficulty type syndrome patterns	341
76th Difficulty	Meaning of tonification and dispersion	349
77th Difficulty	Treating diseases that have not yet onset	353
78th Difficulty	Needling techniques for tonification and dispersion	355
79th Difficulty	Tonification and dispersion using different needling directions	357
80th Difficulty	Observing the arrival of Qi	359
81st Difficulty	Correction on tonification and dispersion for deficiency and excess	361
	Therapist's Attitude	365
	Bibliography	367
